Lube Coat 20

Introduction :

- Lube coat - 10 is a Water Based Coating. It contains graphite with some binders and additives. It is applied to obtain a smoothest finish.

Application :

- It is mainly used in gravity die casting and other general casting techniques.
- It is also used in non-ferrous alloy manufacturing units.

Advantages :

- Easy application, easy to store and can be stored for a longer period.
- Gives good surface finish.
- User can change the thickness level of the coating by adding water as per need and hence can obtain the paste as required.
- It helps in solidification of casting.

How To Use :

- Lubecoat-10 should be used directly from the packed drum or can be diluted with water depending upon the application.
- Stir it thoroughly before use.
- It can be applied on the surface through brush or by spray.
- Clean the surface before applying the coat.
- It can be applied in many layers as required.

Precautions :

- This coating is not dangerous to skin but still hand gloves should be used while handling and using it.

Packing :

- 5 kg Jar /50 kg Plastic Drum or as required.
