Lube Coat 20

Introduction :

- Lube coat - 20 is a Oil Based Coating. It contains graphite with some binders and additives. It is applied to obtain a smoothest finish.

Application :

- It is mainly used in aluminium extrusion plants and other such industries.
- It is also used in non-ferrous alloy manufacturing units to a certain extent.

Advantages :

- Works as good mould release agent.
- Gives good surface finish.
- Also provides lubrication.

How To Use :

- Lube coat - 20 should be used directly from the packed drum without adding any further chemicals.
- Stir it thoroughly before use.
- It can be applied on the surface through brush or any other cleaning agent.
- Clean the surface before applying the coat.
- It can be applied in many layers as required.

Precautions :

- This coating is not dangerous to skin but still hand gloves should be used while handling and using it.
- Avoid contact with eyes.

Packing :

- 30 kg Metal Drum / 50 kg Plastic Drum or as required.
